www.digidesign.com

This year Digidesign is showcasing the new, supercharged HD Accel PCI card for Pro Tools|HD systems. Explore options such as 96i I/O — the new, sixteen-input audio interface for Pro Tools|HD — and experience the latest amazing plug-ins for Pro Tools|HD Accel, including Digidesign's new Impact and ReVibe plug-ins. Also check out Focusrite's latest developments: Platinum Paks (with BLUE Microphones), The Liquid Channel, ISA 430 MKII, and the Forte Suite plug-in. You'll also get a first-hand look at DigiDelivery, Mac OS X "Panther" and Power Mac G5 support, and much more!

HD Accel / Pro Tools 6.2 Software

Add the new HD Accel PCI card to any Pro Tools|HD system and supercharge workflow like never before. Replacing the original HD Process cards, the HD Accel card features nearly twice the DSP power of HD Process cards, and nearly four times that of MIX Farm cards — and provides support for new, HD Accel-exclusive plug-ins like Impact and ReVibe. HD Accel cards ship with Pro Tools TDM 6.2 software.

96i I/O

\$ 2,195

96i I/O enables you to introduce output from keyboards, samplers, effects, and other line-level equipment into Pro Tools|HD. Its sixteen analog inputs provide balanced or unbalanced A/D conversion using tip-ring-sleeve (TRS) 1/4" connectors. A S/PDIF port capable of 24-bit digital I/O allows you to connect professional DAT recorders, CD players, and other digital recording devices. And A/D and D/A converters of the same quality as those of the Digidesign 96 I/O ensure that your signal's fidelity is always maintained going into and coming out of Pro Tools.

ReVibe

\$ 995

A new plug-in from Digidesign designed exclusively for the new HD Accel card, ReVibe gives Pro Tools TDM users a reverb-modeling tool that can handle any reverberation task. The 96 kHz-capable ReVibe provides eight entirely new reverb algorithms combined with an extensive collection of room reflection models, enabling you to achieve the perfect blend of ambience and coloration. Designed to accurately recreate actual acoustic spaces, ReVibe's the perfect complement to Reverb One's highly musical reverb characteristics.

Impact

\$ 695

Experience professional, console-style mix bus compression without the console! The Impact compressor TDM plug-in brings unparalleled, console-style mix bus compression to the Pro Tools|HD Accel environment. Impact features include support for multi-channel tracks up to 7.1, up to 192 kHz sample rate support, four selectable compression ratios, variable controls for Attack, Release, Threshold, and Make-up Gain, an animated gain reduction meter, and a side-chain input.

Focusrite Platinum Paks

\$ 899 – 1,299*

For a limited time, Focusrite and BLUE Microphones bring you three new budget-conscious, power-packed bundles — the VoiceMaster Pro Pak, the TwinTrak Pro Pak, and the Trak Master Pak — each of which includes its namesake Focusrite Platinum Series device and a BLUE Bluebird microphone kit: the BLUE Bluebird microphone, the BLUE BirdNest pop filter, a BirdCage shock mount, and a premium Blueberry cable.

* This special promotional pricing is available through January 31, 2004.

Focusrite Liquid Channel

\$ 3,495

The Liquid Channel is a revolutionary professional channel strip that precisely replicates any mic pre and any compressor by combining radical new preamp technology with advanced convolution techniques. The preamp consists of a brand new multi-tapped "Liquid" transformer, combining electronic and transformer-based signal paths with a matrix that selects appropriate values of resistance and capacitance depending on the desired model. In addition, The Liquid Channel features a single digital Focusrite EQ that utilizes the parameters of the acclaimed Focusrite ISA 110.

Focusrite ISA 430 MKII

\$ 2,795

Representing the best of Focusrite's heritage, the ISA 430 MKII brings together some new exclusive features alongside designs from existing products, all contained within a single mono channel strip. It features the same core elements as the original ISA 430, as well as enhanced, multi-format compression options, improved processing and routing flexibility, variable impedance, instant air, and a 192 kHz A/D conversion option.

Focusrite Forte Suite Plug-in

\$ 595

The Focusrite Forte Suite is a channel strip plug-in for Pro Tools|HD Accel systems that's based on the now legendary Focusrite Forte recording console of the mid-80s. Forte Suite features software models of the classic ISA 110 EQ and ISA 130 Dynamics module including compressor, de-esser and noise gate. It also includes graphical representations of EQ, compression, and related module curves. For the surround mixer, the Forte Suite compressor supports all Pro Tools surround formats. And the Forte Suite plug-in's interface components resemble the ISA series modules treasured by audiophiles the world over.

Compatibility Options

Open up your ears and mind — Pro Tools has never been so compatible with your favorite third-party software. Unleash the power of Reason, Live, and others with ReWire 2.0 support, which allows streaming of up to 64 channels of audio from your favorite applications directly into Pro Tools for further mixing possibilities. And with new and improved Core Audio, ASIO, and Wave drivers, you can use Digidesign hardware with your favorite compatible software applications. Also, be sure to check out FXpansion's new VST to RTAS adapter, enabling you to use VST plug-ins with Pro Tools.

DigiDelivery

\$2,995 – \$9,995

Exchange any kind of digital file of virtually any size with anyone in the world. DigiDelivery™ is faster, more secure, and more reliable than FTP or overnight deliveries, and easily installs on your existing network, cable modem, or DSL modem. Simply drag and drop files to send a delivery, or click a link in an email to receive a delivery — no need for recipients to enter IP addresses, usernames, or passwords. Military-grade encryption guarantees the security of your files. DigiDelivery saves time and money by eliminating account management hassles, customization costs, and service fees, while automated reporting makes billing your customers a breeze.

Don't forget to also check out the latest plug-ins and applications that ship with every Pro Tools system: Propellerhead Software Reason Adapted, Ableton Live Digidesign Edition, and IK Multimedia's SampleTank SE, AmpliTube LE, and T-RackS EQ!
